

Epigenetics

DNA Methylation

Bisulfite Methods

EZ DNA Methylation™ Kits

Streamlined procedure for bisulfite conversion of DNA using specialized kits designed for different samples types.

Page 10-15

Format:
Spin-Column
96-Well Plate

Non-Bisulfite Methods

OneStep qMethyl™ Kits

Real-time PCR procedure for bisulfite-free determination of methylation status at specific loci.

Page 26

Format:
96-Well Plate

Antibody Methods

5-mC DNA ELISA Kit

High-throughput method for accurate 5-mC detection in genomic DNA.

Page 24

Format:
96-Well Plate

Pico Methyl-Seq™ Library Prep Kit

Post-bisulfite library preparation for Whole Genome Bisulfite Sequencing.

Page 27

MeDIP Kit

Highly specific enrichment of 5-mC in DNA by immunoprecipitation.

Page 25

Epigenetics

DNA Hydroxymethylation

Quest 5-hmC™ DNA ELISA Kit

High-throughput method for specific 5-hmC detection in genomic DNA.

Page 30

Format:
96-Well Plate

DNA Degradase™ Plus

Generate single nucleosides for global 5-hmC quantification by LC/MS.

Page 37

Chromatin Analysis

Zymo-Spin™ ChIP Kit

Protein-DNA interaction analysis.

Page 34

Format:
Spin-Column

ChIP DNA Clean & Concentrator®

Two minute DNA clean-up procedure for ChIP DNA.

Page 35

Format:
Spin-Column
96-Well Plate

RNA Methylation

EZ RNA Methylation™ Kit

Fast and reliable bisulfite conversion of RNA for methylation analysis.
