

Product Change Notification Letter

Date: April 8, 2025

Product Change Notification #: PCN-2025-03-12

Dear Valued Distributor:

We are writing to inform you of an upcoming update to the configuration of our kits, which will now incorporate a new kit box as part of our continuous improvement process. This change applies to the following products in our portfolio:

Product Name	Part No.
DNA/RNA Shield Fecal Collection Tube - DX (10 pack)	R1101-E
DNA/RNA Shield Fecal Collection Tube (with Beads) - DX (10 pack)	R1137-E

This adjustment is being made to reduce shipping volume by transitioning to a smaller kit box. As part of this update, the kit box label will also be revised to fit the new packaging format. These changes are considered low impact and low risk, as they do not affect the contents, performance, or functionality of the products.

To facilitate a seamless transition:

- **Implementation Timeline:** The updated configuration is expected to be implemented by Q4 2025.
- **Remaining Inventory:** Any remaining stock or lots with the current kit box will continue to be available until all inventory is sold. The updated box configuration will be applied to the next product lot following the implementation date.

We request that you share this notification with the relevant personnel in your organization.

Thank you for your continued partnership.

Sincerely,

Zymo Research Corporation
