Product Change Notification: RD.PCN.141

Dear Valued Distributor/Customer:

This letter serves to inform you that several of our environmental DNA and RNA extraction kits will undergo a change of the Zymo-Spin III-HRC Filters (C1058-50) for the new updated version Zymo-Spin IV-IR HRC Filters (C1010-50). As part of our commitment to quality and continuous process improvements, we have integrated customer feedback and recommendations into the new design. The revised inhibitor removal columns feature a faster workflow, improved appearance, and more robust inhibitor removal performance.

What will change with this update:

- ✓ **Simplified Workflow and Improved Appearance:** HRC columns will now come with a slurry or “wet” format, deleting the need to add prep buffer prior to adding your sample.
- ✓ **Improved Performance:** Updated chemical formulation allows the HRC column to bind to more PCR inhibitors effectively cleaning up strongly inhibited samples in just one step!

The effort to transition to the new updated version continues with the **Zymo Environ Water RNA Kit** (Cat # R2042) starting August 1st, 2025. If you need to complete your study using **Zymo Environ Water RNA Kit** (Cat # R2042) using the **Zymo-Spin III-HRC Filter** format, please purchase prior to August 1st, 2025.

Other kits will also transition using the below schedule:
